

Our Equipment. Our Expertise.

What is ITility?

Even in a small or mid-sized business, IT is complicated and expensive. Installing servers, firewalls, and maintaining backups take a lot of time and increases your overall cost of doing business.

ITility is a managed IT service designed for the SMB that offers you a complete IT services package so you can run your business without all the work. ITility requires no management on your part, and uses DynaSis infrastructure and the DynaSis data center to provide you with reliable service, all for a low fixed monthly cost.

“DynaSis gave my firm a world-class IT department at small business prices.”

**Travis Darnell, President
Sunbelt Material Handling**

Reduce Your IT Investment

The infrastructure in your server room is expensive to maintain and upgrade, not to mention time consuming. With DynaSis ITility, the only equipment you need is basic office PC's, reducing the time and money you spend on IT. ITility services are available at a flat low monthly price. The impact on your bottom line is clear- spend less money and time on IT and get better results.

Guaranteed 99.999% Uptime

Companies need to do business with firms that are “always on”. ITility allows you to become one of those firms with reduced downtime and server crashes, as well as protection against crippling viruses.

Increase Efficiency and Productivity

Become more productive at the office or away with the capability to access, modify, and share data in real time. Employees at any location can collaborate on projects, getting work done quickly and efficiently.

Freedom to Work from Anywhere

With ITility, the only thing you need to work just like you do at the office is a high speed Internet connection. Your data is stored at the DynaSis datacenter and is available to you from any device at any location.

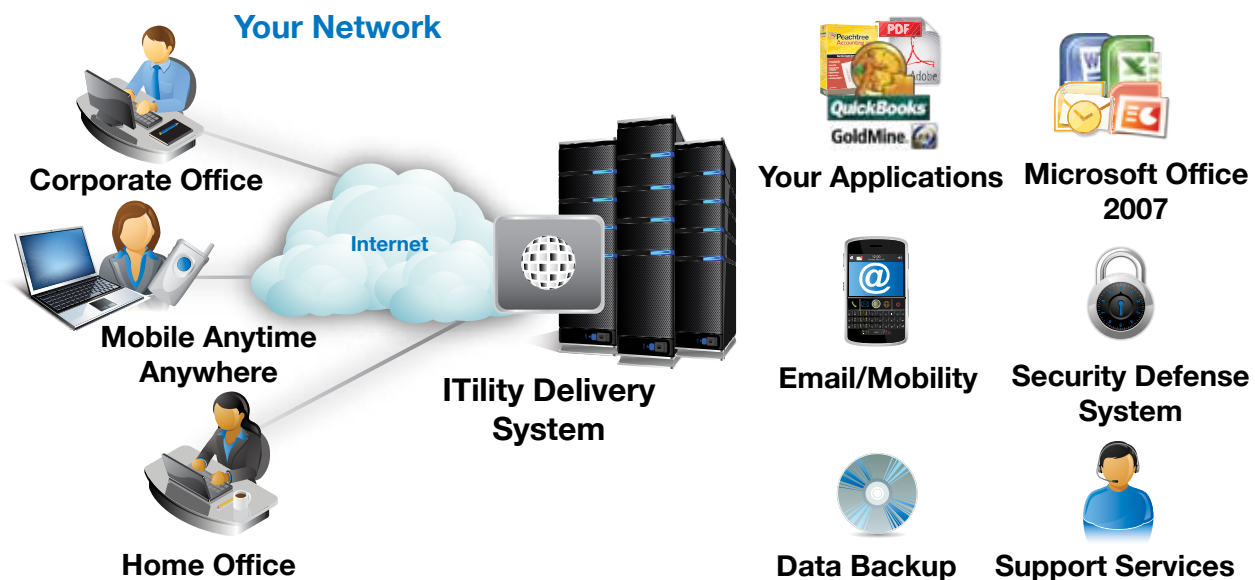

How IT Works

Any device with an Internet connection now becomes your "office computer". Office workers, home office workers, and road warriors can access company data and full scale applications without the use of a VPN or remote desktop software. Files and data are automatically backed up to the network and the DynaSis datacenter.

The ITility system delivers all of your network data, files, and applications over a secure Internet connection from DynaSis data center servers. Access to your network is provided via the ITility customer web portal.

ITility Utopia from DynaSis includes everything you need for your network: your company applications, Microsoft Office 2007, mobility, email, security, and data backup. Instead of purchasing this infrastructure, maintaining, and storing it on your site, it's hosted from the state-of-the-art DynaSis datacenter where expert engineers manage and maintain your network.

What's Included

Even in a small or mid-sized business, IT is complicated and expensive. Installing servers, firewalls, and maintaining backups take a lot of time and increases your overall cost of doing business. ITility Utopia is a managed IT service designed for the SMB that offers you a complete IT services package so you can run your business without all the work. ITility Utopia requires no management on your part, and uses DynaSis infrastructure and the DynaSis data center to provide you with reliable service, all for a low fixed monthly cost.

Your Applications

Leverage the speed of the DynaSis network by hosting your applications like Microsoft Office or your CRM system. Applications are delivered to you via a secure Internet connection instead of installing and maintaining them on your local PC, saving you time and giving you flexibility to work anywhere.

Email/Mobility

No more being chained to a desk. All you need to access your data is an Internet connection, giving you the ability to work anywhere, whether it's at the local coffee shop, or thousands of miles away.

Data Backup

Automatic backups mean no more worrying if you backed up your data; rest easy knowing your data is secure and available in the event of a disaster.

have to worry about core business software or time consuming updates.

Security Defense System

For companies that don't have security as a core competency, building the infrastructure, hiring and training personnel, and maintaining security practices can be a large investment, fraught with risk. DynaSis offers anti-virus, managed firewalls, and anti-spam protection, so you don't have to do the heavy lifting.

Support Services

DynaSis has a team of friendly and knowledgeable support specialists here to solve your problems quickly and easily. Remote Helpdesk engineers solve 95% of all service requests via phone or email and usually within 30 minutes or less. Onsite support is also available should you need it.
